EXPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the increase in United States exports of domestic and foreign merchandise, including Special Category commodities, and unadjusted for seasonal variation, from $2,138.9 million in September to $2,286.5 million in October[1], reflected higher levels of exports to all areas except Latin American Republics. The changes in dollar value of area totals from September to October were as follows: Western Europe, from $709.2 to $800.5 million; Canada, from $401.2 to $443.6 million; Latin American Republics, from $333.4 to $327.1 million; and all other countries, from $695.1 to $715.2 million.

With Special Category commodities excluded, exports of domestic and foreign merchandise rose from $1,983.8 million in September to $2,146.7 million in October. Increases were noted in exports to O.E.C.D. countries in Europe, from $616.2 to $710.3 million; E.E.C. (European Economic Community) countries, from $360.6 to $403.1 million; and Canada, from $389.2 to $429.4 million. Exports to Latin American Republics declined from $324.4 to $317.7 million.

[1]See the October 1964 issue of Report No. FT 900-E for seasonally adjusted figures on total exports, excluding Military Assistance Program--Grant-Aid shipments. Seasonally adjusted data are not available for total exports including Military Assistance Program--Grant-Aid shipments or by country of destination.

During the period increases were reported in exports to the continents of Europe, North America, Asia, and Africa, while decreases were reported in exports to South America and Australia and Oceania. Exports to Europe rose from $639.1 million in September to $729.4 million in October, as the result of increments in exports to the United Kingdom, from $125.8 to $151.2 million; The Netherlands, from $76.6 to $97.2 million; France, from $55.2 to $67.0 million; Turkey, from $10.9 to $20.6 million; Denmark, from $10.3 to $17.4 million; Belgium and Luxembourg, from $46.9 to $53.0 million, and Spain, from $21.5 to $27.4 million.

Exports to North America climbed from $563.7 to $613.5 million, primarily as a result of a substantial gain in exports to Canada, from $389.2 to $429.4 million. The rise in exports to Asia, from $422.9 to $448.3 million, was due in part to increases in exports to Japan, from $139.9 to $157.4 million, and Taiwan (Formosa), from $9.6 to $19.1 million, which were offset by a decrease in exports to Burma, from $7.7 to $1.3 million. A gain in exports to the Republic of South Africa, from $29.9 to $40.7 million, was the main reason for the over-all increase in exports to Africa, from $93.4 to $111.9 million.

Exports to South America declined from $187.8 million in September to $171.6 million in October, owing mainly to losses in exports to Argentina, from $26.4 to $17.5 million, and Brazil, from $41.0 to $32.5 million. However, exports to Peru advanced from $14.0 to $19.7 million. The fall in exports to Australia and Oceania, from $76.8 to $71.9 million, was due to a decrease in exports to Australia, from $66.6 to $61.6 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as nongovernment shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program--Grant-Aid shipments (for which separate figures are shown in the footnotes of this report), Mutual Security Program economic assistance shipments, and shipments of agricultural commodities under P.L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. (The separate information which is available on exports under P.L. 480 and related laws may be obtained from the Economic Research Service and the Foreign Agricultural Service of the Department of Agriculture.) Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries, not entered as imports, is not included in export statistics.

COUNTRY DEFINITION: Although the country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured, the statistics do not always reflect this definition, as the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country, as known to the exporter at the time of shipment from the United States, to which the goods are to be shipped in their present form. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment or merchanting countries and undercounted for other countries. As explained in the footnotes to the table, exports of Special Category commodities are not included in any of the published country totals, for reasons of security.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all export documents. For the figures shown in this report, the sampling variability can be ignored since the probable variability due to sampling is either less than $50,000 (the largest variation from rounding of figures) or less than a trivial percentage of the individual totals shown.

In addition to the effects of sampling variation and the difficulties described above under COUNTRY DEFINITION, the data in this report are subject to errors from such sources as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under $100, and the omission of parcel post shipments valued under $50. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of export data is contained in the foreword of Reports No. FT 410 and FT 420. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.
